Lab 6 - Maven Build using Scripted Pipeline
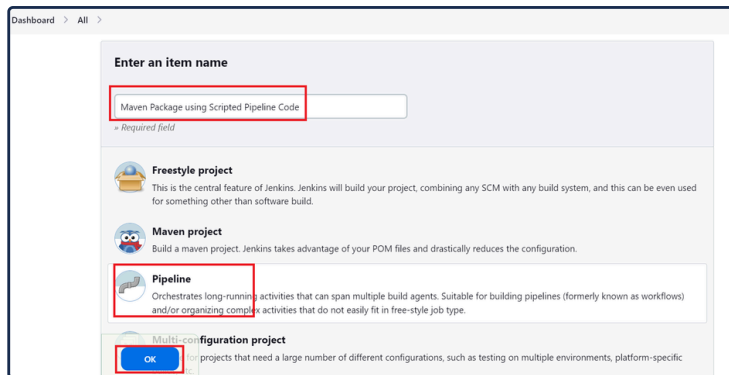

cloudatwork.io The Best Place to Learn Azure and DevOps

In this document:

- Create a Jenkins Pipeline
- Paste the Scripted Pipeline Code
- Run the Pipeline
- Verify the JAR created

---

Create a Jenkins Pipeline

Create a Pipeline as shown:

Paste the Scripted Pipeline Code

```
1  node {
2    stage('Clone Github repository') {
3          git credentialsId: 'github-creds', url: 'https://github.com/CloudWithRaghu/HelloDevops.git'
4      }
5    stage('Package') {
6          sh 'mvn package'
7        }
8  }
```

Run the Pipeline

Verify the JAR created

```
1  cd /var/lib/jenkins/workspace
2  cd 'Maven Package using Scripted Pipeline Code'
3  cd target
4
5  sudo java -jar devops-0.1.0.jar
6  The current local time is: 15:14:08.203
7  Hello DevOps Engineers
```
